

Before you compare key rings, think about what happens when you need to replace a key.

TAMPER-PROOF KEY-RINGS™

featuring Morse Watchmans'
Replaceable HUB Technology

Your cost-effective secure key ring solution.
It's the ONLY key ring on the market
that easily allows you to re-use
your key ring without cutting it apart.
Just attach a new HUB and click it in.
NO CRIMPING TOOLS REQUIRED!

The perfect combination
with our renowned
KeyBan k® or KeyWatche r®
Key Management Systems

TAMPER-PROOF KEY-RINGS™

Only Morse Watchmans manufactures Key-Rings™ that incorporate ease-of-use, a tamper-proof locking mechanism and unique identification system while offering you the flexibility to add or remove keys without destroying the expensive key ring. With other key rings, you would have to cut through the stainless steel and replace the entire ring. Morse Watchmans' Replaceable Hub Technology allows you to re-use the key ring and replace the hub at a fraction of the cost. Simple to use and easy to re-use, yet adds security and value.
