

1080R

KSQ's 1080R Digital locker lock features a keypad for PIN operation and Mifare 13.56MHz RFID Reader for card operation. It features, multi-user and single user modes and has 3 levels of management, with the flexibility of programming to suit almost any application. The 1080R is the perfect solution for Public Share locker operation as it features automatic opening between 1 minute and 24 hours after locking to deter ownership or extended use of lockers.

Highly polished zinc alloy construction with an integrated pull handle. The 1080R offers quality with features to meet all locker applications. The range includes the 1080DAO 125 KHz 1k Classic RFID Cards and PIN, and the 1080M Mifare card only models.
