

The AL238 Combination Locker Lock Model is a full featured mechanical combination cam lock with Master override keys and code discovery feature. The AL238 features a 4 wheel combination with large and easy to read dials with white on black numbers and up to 10,000 possible combinations. Made from a high quality solid polished alloy zinc housing, the code discovery feature using the Master Key will reveal the combination of the lock when it is unknown or forgotten. Red and green "in use" indicators are ideal for shared user application. KSQ's AL238 is budget priced and perfect for replacing conventional key Various Cams in straight and offset sizes.

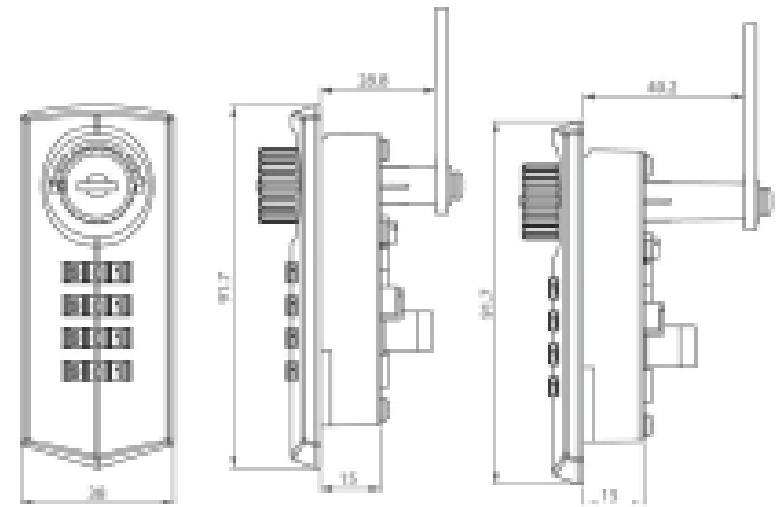

AL-238
